Professional Summary

I'm a passionate and self-motivated frontend web developer with 2 years of experience crafting responsive and modern websites using HTML, CSS, and JavaScript. I focus on clean UI/UX, mobile responsiveness, and code efficiency. Currently expanding my skills in React.js to build dynamic user interfaces. I'm seeking freelance and remote opportunities where I can grow, collaborate, and contribute to impactful digital products.

Skills

- Core: HTML5, CSS3, JavaScript (ES6), Responsive Web Design
- Tools & Libraries: Bootstrap, Tailwind CSS, Git, VS Code
- Learning Now: React.js, WordPress, PHP Laravel
- Soft Skills: Time Management, Communication, Adaptability, Team Collaboration

Projects

Shopify Landing Page Clone

Recreated Shopify's landing page layout using HTML and CSS. Focused on visual accuracy and responsiveness.

Recipe Website

Designed a static website featuring various recipes with organized UI and modern layout.

Amazon Landing Page Clone (In Progress)

Currently developing a high-fidelity clone of Amazon's UI as part of portfolio-building.
